

Computing Curriculum Overview 2023-24

	ESafety		Algorithms 1		Algorithms 2 - Programming		How the internet works		How the Internet Knows who you are.		Hardware				
JD															
KS3															
Year 7	Internet Safety	History of Computers		Input/Output Devices		Binary		Inside a computer		Microbits		Scratch	Python Programming	Robotics	Wearable technology
															 
Year 8	HTML	Algorithms - flowcharts		Block programming		Boolean Logic		Python Programming							
															
Year 9	Python	Encryption		Compression		Algorithms		Computer Networks		Binary		Python	IDEA		
			  					  			 				

KS4

1.1 Systems Architecture

1.1.1 Archi

1.1.2 CPU P

1.1.3 Embe

1.2 Memory and storage

Key Stage 3 National Curriculum

	_design, use and evaluate computational abstractions that model the state and behaviour of real-world problems and physical systems
	_understand several key algorithms that reflect computational thinking [for example, ones for sorting and searching]; use logical reasoning to compare the utility of alternative algorithms for the same problem
	_use 2 or more programming languages, at least one of which is textual, to solve a variety of computational problems; make appropriate use of data structures [for example, lists, tables or arrays]; design and develop modular programs that use procedures or functions
	_understand simple Boolean logic [for example, AND, OR and NOT] and some of its uses in circuits and programming; understand how numbers can be represented in binary, and be able to carry out simple operations on binary numbers [for example, binary addition, and conversion between binary and decimal]
	_understand the hardware and software components that make up computer systems, and how they communicate with one another and with other systems
	_understand how instructions are stored and executed within a computer system; understand how data of various types (including text, sounds and pictures) can be represented and manipulated digitally, in the form of binary digits
	_undertake creative projects that involve selecting, using, and combining multiple applications, preferably across a range of devices, to achieve challenging goals, including collecting and analysing data and meeting the needs of known users
	_create, reuse, revise and repurpose digital artefacts for a given audience, with attention to trustworthiness, design and usability
	_understand a range of ways to use technology safely, respectfully, responsibly and securely, including protecting their online identity and privacy; recognise inappropriate content, contact and conduct, and know how to report concerns

KS4

1.1 Systems Architecture	2.1 Algorithms
1.1.1 Architecture of the CPU	 2.1.1 Computational thinking
1.1.2 CPU Performance	 2.1.2 Designing, creating and refining algorithms
1.1.3 Embedded systems	 2.1.3 Searching and sorting algorithms
1.2 Memory and storage	2.2 Programming fundamentals
 1.2.1 Primary storage (Memory)	 2.2.1 Programming fundamentals
1.2.2 Secondary storage	 2.2.2 Data types
 1.2.3 Units	 2.2.3 Additional programming techniques
1.2.4 Data storage	
1.2.5 Compression	
1.3 Computers networks, connections and protocols	2.3 Producing robust programs
 1.3.1 Networks and topologies	2.3.1 Defensive design
 1.3.2 Wired and wireless networks, protocols and layers	2.3.2 Testing
1.4 Network security	2.4 Boolean logic
1.4.1 Threats to computer systems and networks	 2.4.1 Boolean logic
1.4.2 Identifying and preventing vulnerabilities	
1.5 Systems software	2.5 Programming languages and Integrated Development Environments
1.5.1 Operating systems	 2.5.1 Languages
1.5.2 Utility software	 2.5.2 The Integrated Development Environment (IDE)
1.6 Ethical, legal, cultural and environmental impacts of digital technology	
 1.6.1 Ethical, legal, cultural and environmental impact
